Why not **combine hair and skin treatment?**

As well as making your clients' hair radiant, SPH also offers combined action to **reduce the signs of age and restore the skin's moisture and elasticity**

*1 device, 2 types of treatment*

100% Swiss made  
Device developed and made in Switzerland  
Guaranteed 2 years

## HOW PHOTOSTIMULATION WORKS

**Photostimulation** (or phototherapy) is a **non-aggressive** and **non-thermal** treatment based on the use of different wavelengths corresponding to a precise scope of action. The photons penetrate the skin and are absorbed by the cells. The cells are stimulated and synthesise the other skin components.

So the production of **collagen and elastin** is stimulated and the skin is completely regenerated.

**The appearance of the skin improves immediately.**

Synthon  
Process

## USE IN THE HAIRDRESSING SALON

**Photostimulation** also treats all types of **hair problems**. It can visibly **optimise the regrowth** after alopecia or chemotherapy, slow or even **stop hair loss** in cases of hair thinning, **strengthen the** follicles that are only producing fine fuzz, or consolidate implants.

Photostimulation also activates the penetration of substances applied to the skin and scalp. This property brings out the full **potential of all the treatment applied** in your salon (colour, perms, etc.) **reducing the application time** and **the odours**.

## A RECOGNISED AND PROVEN TECHNIQUE

**Photostimulation** is a technique with long clinical experience.

Photons were first used by NASA to **accelerate the healing of** astronauts' wounds, and since then many clinical trials have proved their efficacy and safety in the **treatment of skin problems**. Thanks to these **stimulatory, anti-inflammatory**, analgesic and corrective **properties**, today they are applied to all areas of medicine.

*The repairing energy of Photons*

## WHY SPH ?

---

**SPH** will revolutionise your salon and the way you work.

This device will help you:

- **Increase** customer loyalty
- **Stand out from your competitors**
- **Bring in** new clients
- **Diversify** the treatment you offer
- **Save time** on each type of treatment (colour, straightening, etc.)
- **Increase your productivity!**

*SPH will bring solutions and complementarity to your usual treatments*

Rejuvenate your hair

**Swiss Bio Inov** designs, manufactures and distributes Photon treatment devices for therapeutic use. Designed and manufactured in **Switzerland**, all the devices have the **latest technological innovations** at a very competitive price. They are the result of many years of research, studies, tests and collaboration between designers, doctors, researchers and specialists of Bio Photonic modulation.

**SPH** is derived from the medical sector and is the latest device in the range. It has been specially designed for use in hairdressing salons, and uses **photon interactions** to treat many different hair problems, or just to increase the potential of the treatment you already provide.

The concept of **biostimulation** has been proven on a wide range of applications and validated by many clinical trials that show its effectiveness and the lack of side effects.
